

BIKEWAYS

The Approved and Adopted East Silver Spring and Takoma Park Master Plans each include a Bikeway System Framework. The Framework bikeways are generally either through stream valley parks or along main roads or railroad tracks. They are expected to be the most popular routes and are identified in the master plans as the highest priority bikeways.

This supplement includes preliminary recommendations for the *neighborhood* bikeways which are to be designated as a follow up to each of the Master Plans. As with the neighborhood routes that are part of the pedestrian system, the neighborhood bikeways included here are to be reviewed and recommended for improvements with the participation of residents of each neighborhood. These bikeways are generally on-road routes where design decisions focus primarily on signage and whether to stripe bikeways.

The master plans' appendices include bikeway terms and guidelines as well as information to be used in the implementation of the Bikeway System Framework.
