

How to use this comparison chart

- Proposed uses are indicated by red text in the left-most column. Proposed zones are in red text in the top row.
- Current uses, their categorization, and current zones are in black text.
- Read across a row to see where a use is currently permitted by right (P) or is a special exception (SE).
- Look at the last row in each proposed use to see where a use is proposed to be:
 - **P**: a use permitted by right
 - **L**: a limited use, which means permitted, if the use meets certain standards; or
 - **C**: a conditional use, which is equivalent to the existing special exception.
- ^ denotes that one (or more) footnotes is associated with the use. The proposed codes aims to take the information found in the footnotes and incorporate them into the body of the text.
- In the residential zones, an **O** denotes a use that is currently allowed only under Cluster or MPDU optional method
- Printing the tables works best on legal-sized paper (8.5"x14")

Comparison of Uses in Existing and Proposed Industrial Zones

^= Use has at least 1 footnote attached			IL	IM		IH
