

APPENDIX

SUBWATERSHED IMPERVIOUSNESS LEVELS

This Appendix contains data that was calculated and analyzed as part of an M-NCPPC planning level study of stream quality and imperviousness in eastern Montgomery County watersheds. A more detailed description of the study can be found in two technical reports: *Environmental Resources: Eastern Montgomery County Planning Areas*, M-NCPPC, revised August 1996, and *Upper Paint Branch Watershed Planning Study*, M-NCPPC, October 1995.
