

Environmental Features

East County Science Center

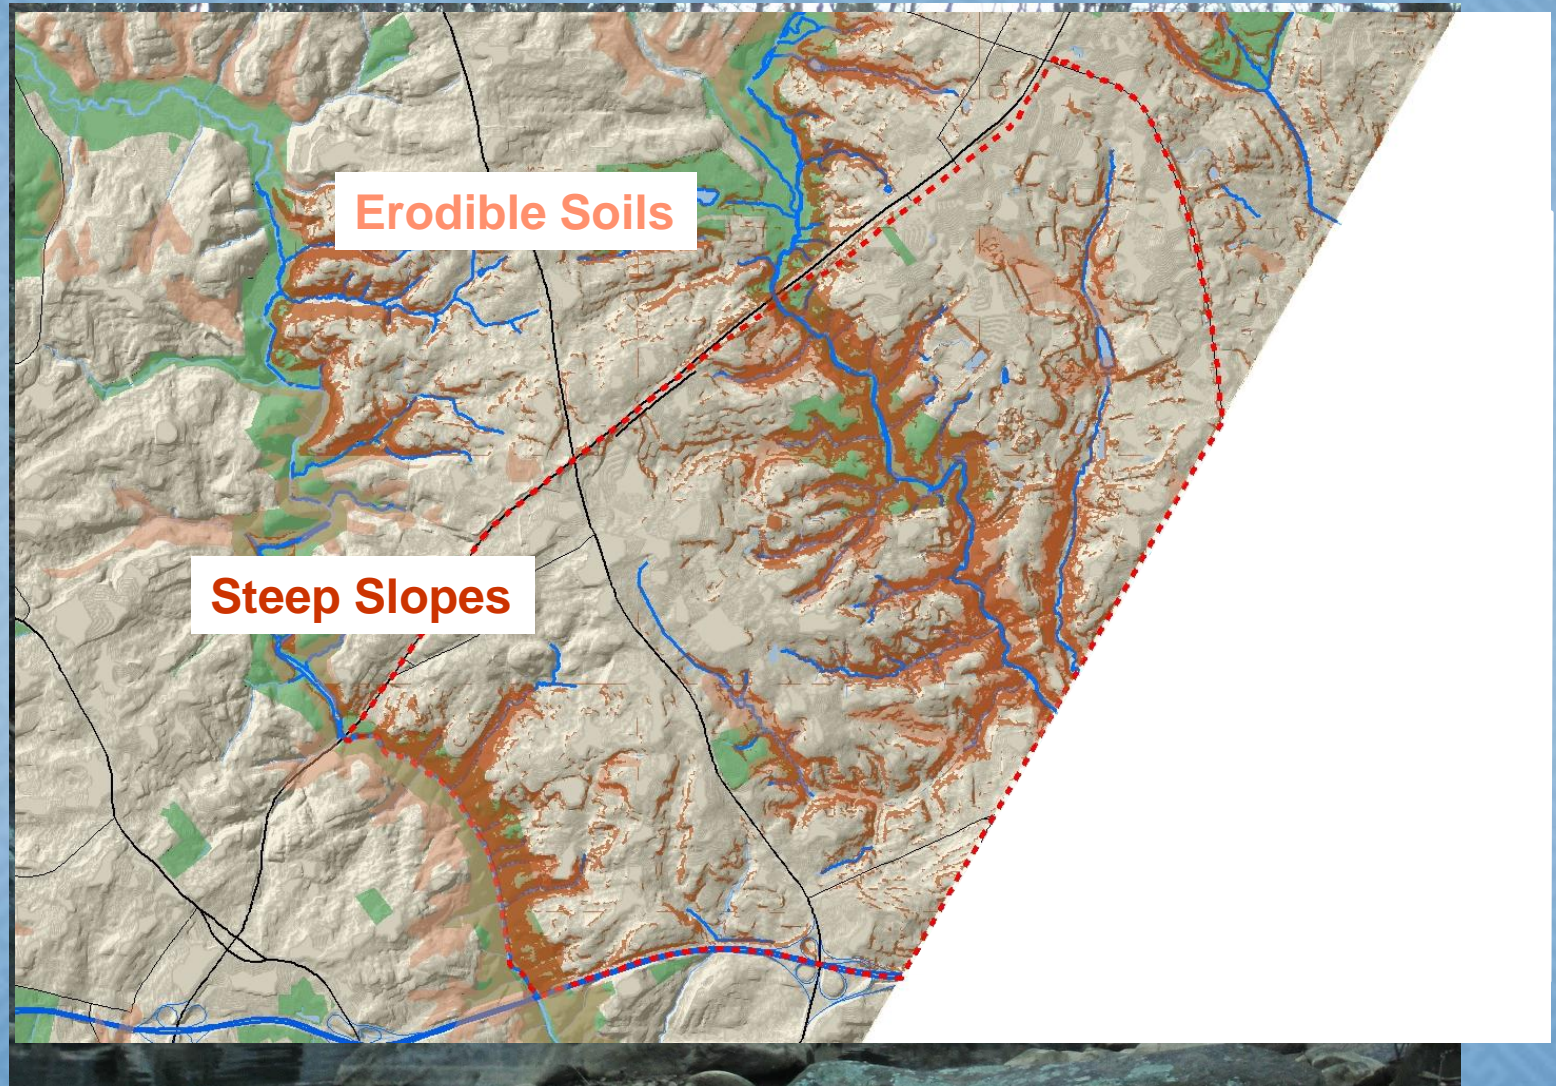

“Fall Zone”

Stream Systems

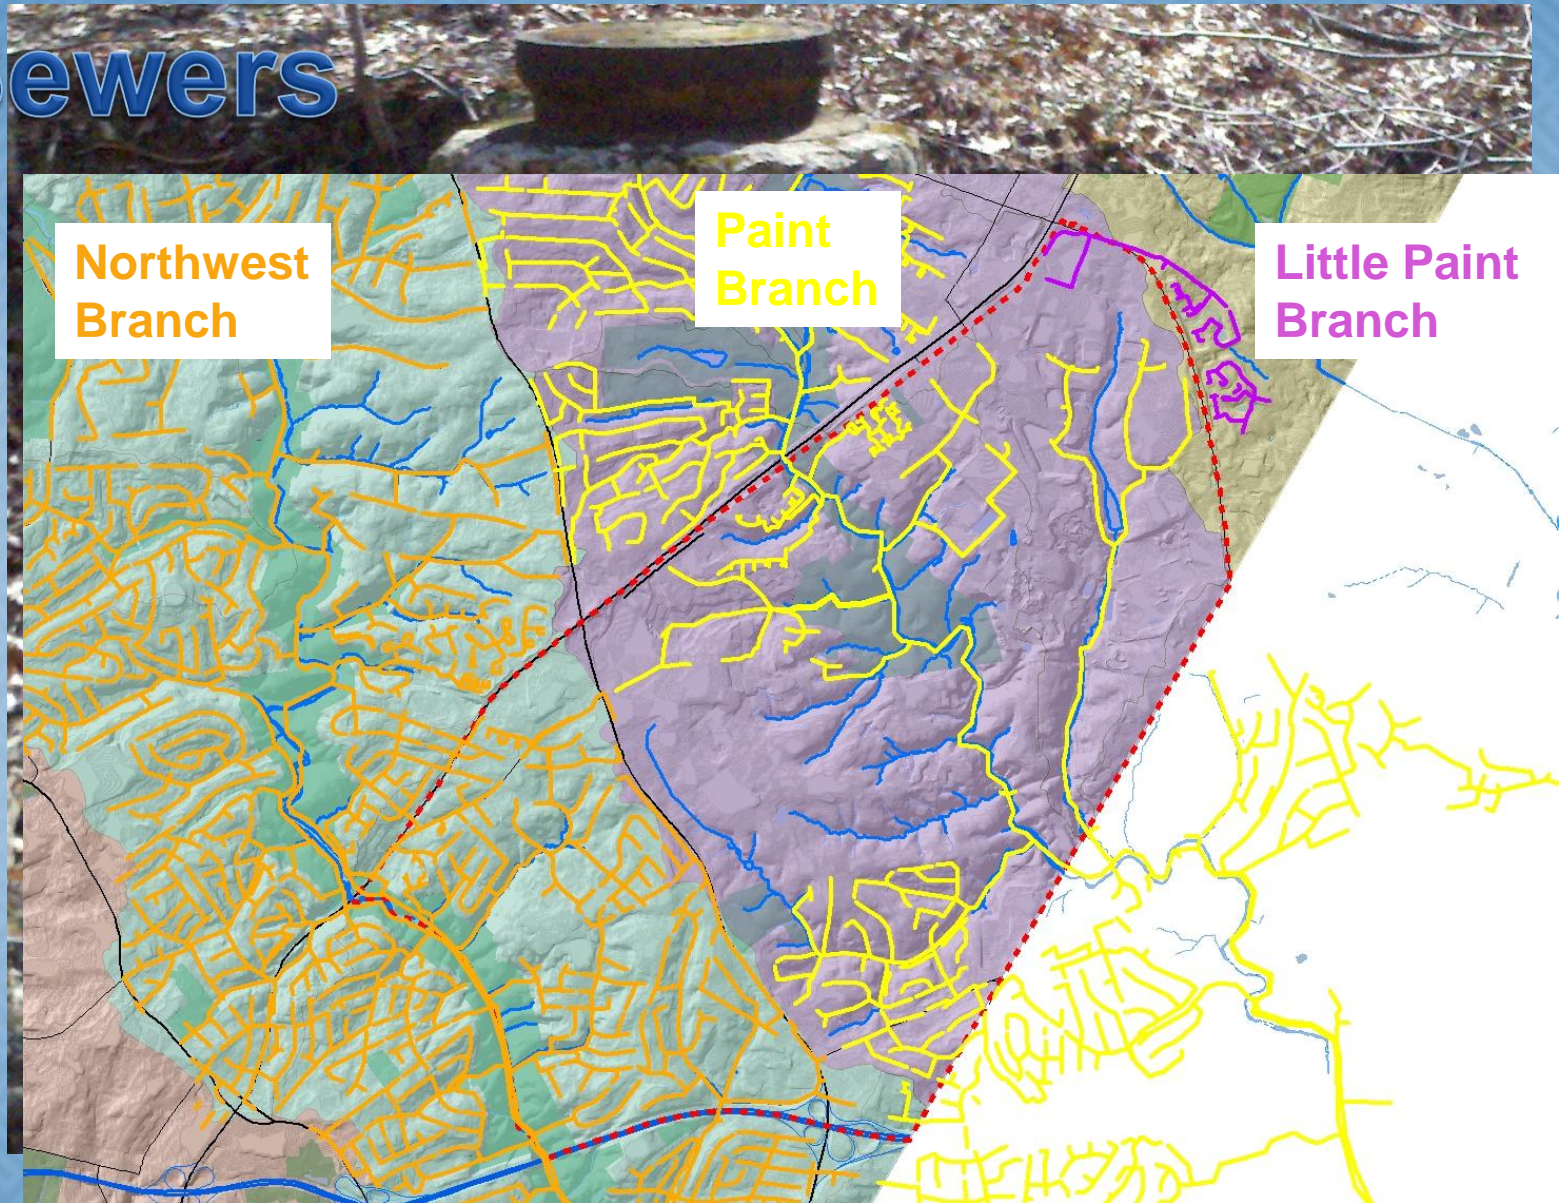

Slopes and Soils

Forest Cover

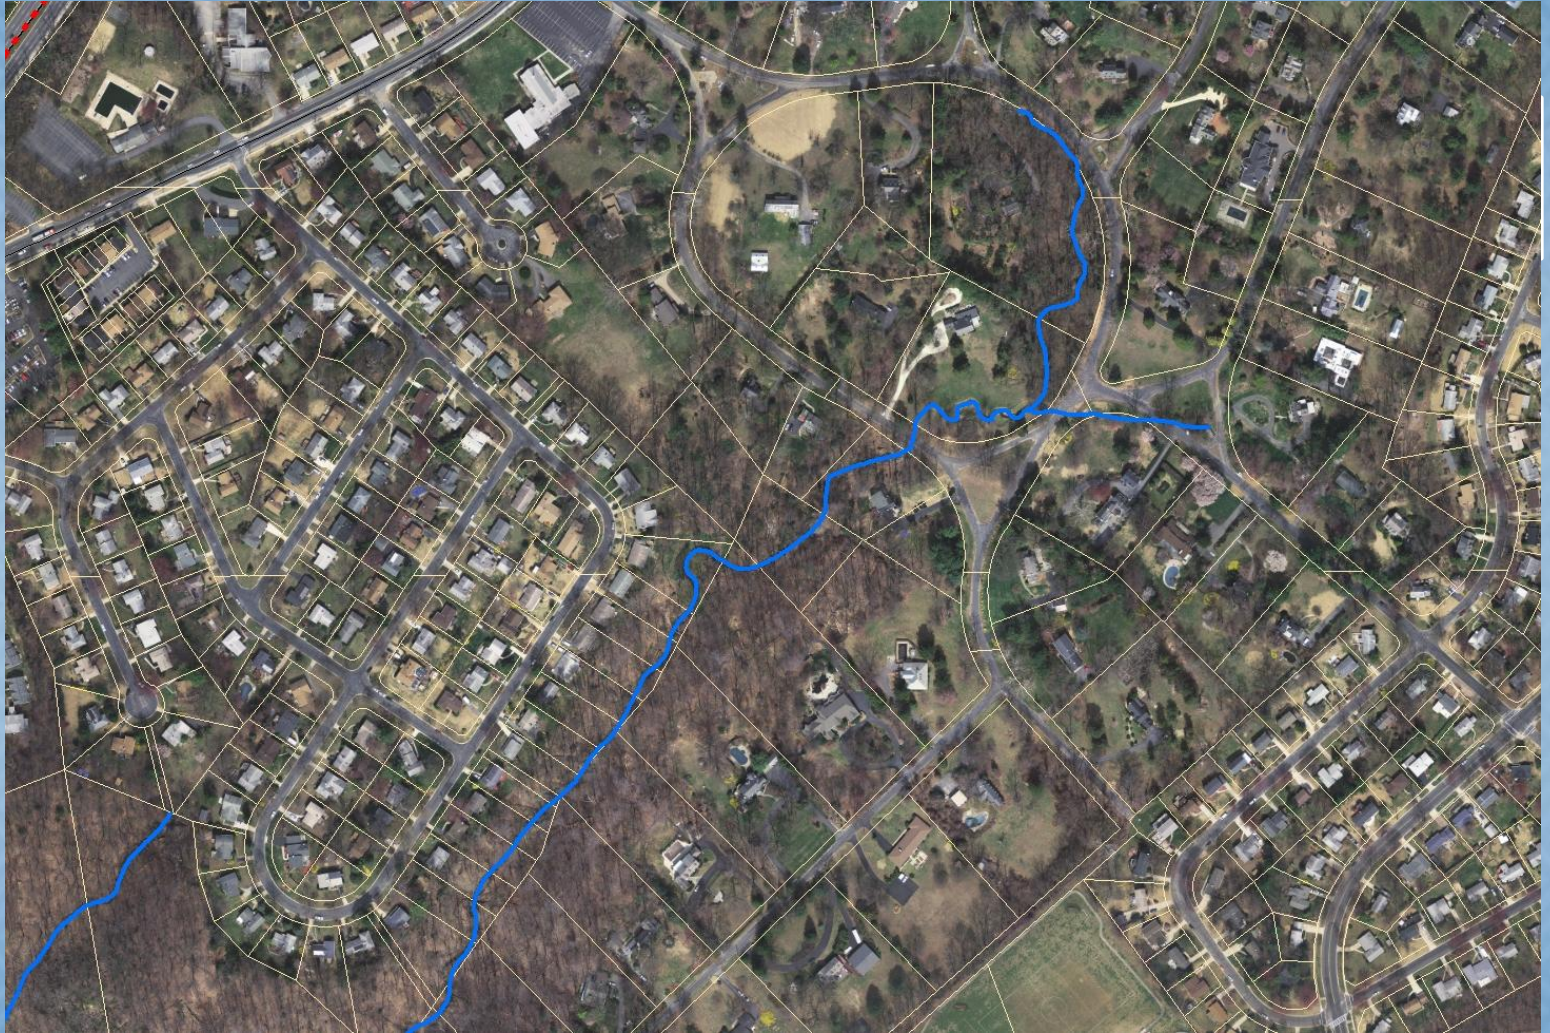

Sewers

Composite

Protections

Side Effects of Development

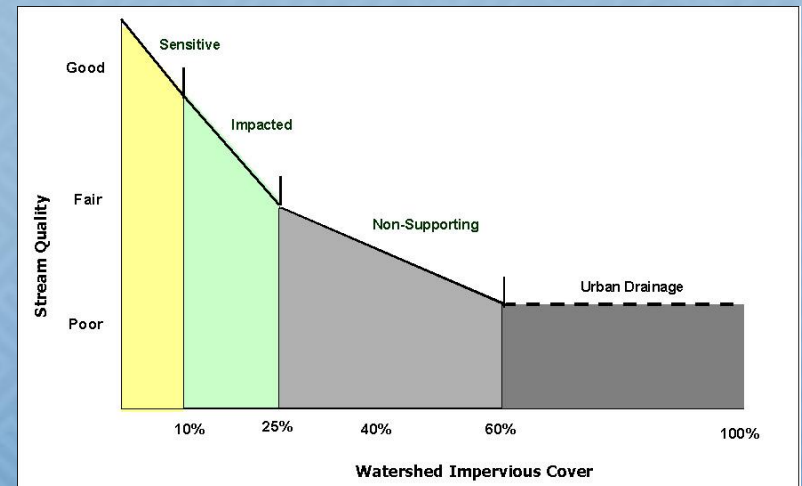

Erosion

Side Effects of Development

Reduced water quality

Side Effects of Development

- Air quality
- Urban “heat island” effect
- Increased contribution to greenhouse gas emissions

Opportunities through Development

Stream restoration

Opportunities through Development

Forest and tree planting

Opportunities through Development

Integrated stormwater management

Opportunities through Development

Green roofs and green walls

Opportunities through Development

Energy use reduction
and energy production
