

## Appendix C-1: Tier #1 to Tier #4 Projects

The BRAC FEIS identified a variety of transportation projects to mitigate the impacts of Walter Reed's relocation to the National Naval Medical Center. Last year, these projects were organized into four tiers based on their priority by MCDOT and SHA. The current funding status of the project tiers is:

- Tier 1 represents projects that have been fully funded
- Tier 2 represents projects that have been partially funded or are anticipate to be funded
- Tier 3 represents projects that are not funded
- Tier 4 represents projects that require further study

The following document identifies projects by tier and identifies whether the funding source is the federal government, state, or county. As noted above, Tier 3 projects have an undetermined funding source.
